## Wireless head for radiator

Datasheet  
1119EN 04/2023

K470W wireless head for radiator, technologically innovative, noiseless and compact, featuring the same dimensions of traditional thermostatic heads.

Use only with the **KD410 Connect-TRV** control unit to control the heating system (KLIMAdomotic TRV series) from remote. The head includes a ring nut with M30 x 1,5 mm connection and an adaptor for use with a wide range of valves with thermostatic option.

**NOTE.** K470WX021 heads cannot be installed on DB radiator valves.

### Versions and product codes

PRODUCT CODE	CONNECTION
K470WX021	M30 x 1,5 mm threaded ring nut + R453HY012 adaptor for other radiator valve bodies (except DB series valves)

### Technical data

- Communication Standard: HA 1.2 ZigBee
- Radio frequency: 2,4 GHz
- Power supply: 2 x 1,5 V AA batteries
- Protection class: IP20
- Pollution degree: 2
- Temperature control range: 8÷28 °C
- Working temperature: 0÷50 °C
- Storage temperature: -20÷70 °C
- Type of casing: white ABS
- Weight: 230 g with batteries
- Ring nut connection: M30 x 1,5 mm, with R453HY012 adaptor for other Giacomini valve bodies (except DB valves)
- Use only with the **KD410 Connect-TRV** control unit to control the heating system (KLIMAdomotic TRV series) from remote

**WARNING.** Use alkaline batteries only.  
Do not use any type of rechargeable battery.

## Components

- |   |                       |

| 1 | Button ▼              |
| 2 | Button ▲              |
| 3 | LED display           |
| 4 | M30 x 1,5 mm ring nut |

## Operation

The K470W wireless head can be used only in combination with the **KD410 Connect-TRV** control unit to control the heating system (KLIMAdomotic TRV series) from remote.

**⚠ WARNING.** Keeping the KD410 Connect-TRV off for long periods can cause an higher consumption of the batteries of the K470WX011 head for radiators.

### Buttons

BUTTON	STATUS	FUNCTION
	Press once shortly	Reduces the desired temperature by 0,5 °C
	Press and hold	Reduces instantaneously the desired temperature by 0,5 °C and keeps reducing it by 0,5 °C every 0,5 seconds till the button is pressed or up to the end value
	Double click	Activation of "Energy-saving" mode
	Press once shortly	Increases the desired temperature by 0,5 °C
	Press and hold	Increases instantaneously the desired temperature by 0,5 °C and keeps increasing it by 0,5 °C every 0,5 seconds till the button is pressed or up to the end value
	Double click	Activation of "Comfort" mode
RESET BUTTON INSIDE BATTERY COMPARTMENT	Hold and press for 5 s	Unpairing of head from KD410 control unit (LEAVE)
RESET BUTTON INSIDE BATTERY COMPARTMENT	Hold and press for 10 s	Reset of factory settings
	Hold and press for 3 s	Activates or deactivates the "Child safety" function
	When "Ad" is displayed: hold and press for 3 s	Adaption to valve body

## LED display and error signals

LED	MEANING
	Status of wireless connection and pairing. Turns on when the wireless connection is established. Turns off when the wireless connection is lost.
	Valve pairing
	Valve removal (LEAVE)
	Adaption to valve body
	Lights up during adaption procedure
	Lights up when the buttons are locked for activation/deactivation of the "Child Safety" function
	Lights up when the battery charge is lower than 15%
	Valve removal failed
	No valve movement possible
	No valve read
	Closing point not read
	Valve pairing failed

## Setting the desired temperature

The desired temperature can be set only through the KD410 Connect-TRV control unit to control the heating system (KLIMAdomotic TRV series) from remote.

## Child Safety Function

Press the ▼ and ▲ buttons for 3 seconds to activate/deactivate the Child Safety function.

## ➤ Head installation and removal

### Possible installation positions

⚠ Installation positions not recommended as the radiator temperature may affect the head.

### Start up

K470W heads are not paired to any KD410 control unit upon production.

For proper use, the head must be paired to a KD410 control unit.

The head can be removed from the KD410 Connect-TRV control unit whenever needed.

Pairing and removal must be performed from the KD410 Connect-TRV control unit.

🔧 **NOTE.** To pair or remove the K470W head to or from the KD410 control unit, also make reference to the KD410Y002 Connect-TRV user manual.

### Installing the head and pairing to the control unit

From the KD410 control unit, add a new valve in the desired room.

Insert the batteries in the K470W head (see "Installing the batteries"), "PA" will appear on the display and a 99-sec countdown will start while pairing of the head and the control unit is in progress.

Once the pairing is completed, the wireless symbol will blink and the "Ad" led will be displayed.

Now the head can be installed on the radiator valve (see "Installing the head on the valve body"); press the ▼ and ▲ buttons to adapt the head to the valve stroke; 6 led symbols will start blinking.

Once the head is adapted, the display will show the desired temperature.

### Installing the batteries

Remove the head cover by pulling it off.

Insert the batteries in the correct orientation, then close the cover.

The K470W head configuration will not change when replacing the batteries.

### Installing the head on the valve body

The head can be installed on the valve body once the K470W head and the KD410 control unit are paired.

#### Installation on Giacomini valves with thermostatic option and M30 x 1,5 mm connection (H and HDB series)

Screw the head ring nut (B) on the radiator valve (A).

#### Installation on other Giacomini valves with thermostatic option (except DB series valves)

Use the R453HY012 ring nut included in the package of the head to install it on other Giacomini valves with thermostatic option.

Connect the threaded ring nut (C) to the reference pins (P) on the radiator valve (D).

Screw the head ring nut (B) on the radiator valve (C+D).

### Removing the head and unpairing from control unit (factory setting reset)

To unpair a K470W head from the KD410 control unit, open the head battery compartment and press the reset button.

First "LE" will be displayed, then a "10-sec" countdown will start and finally the "PA" led will appear.

This means that the head has been unpaired and that it can be removed by unscrewing the ring nut.

## ➤ Dimensions

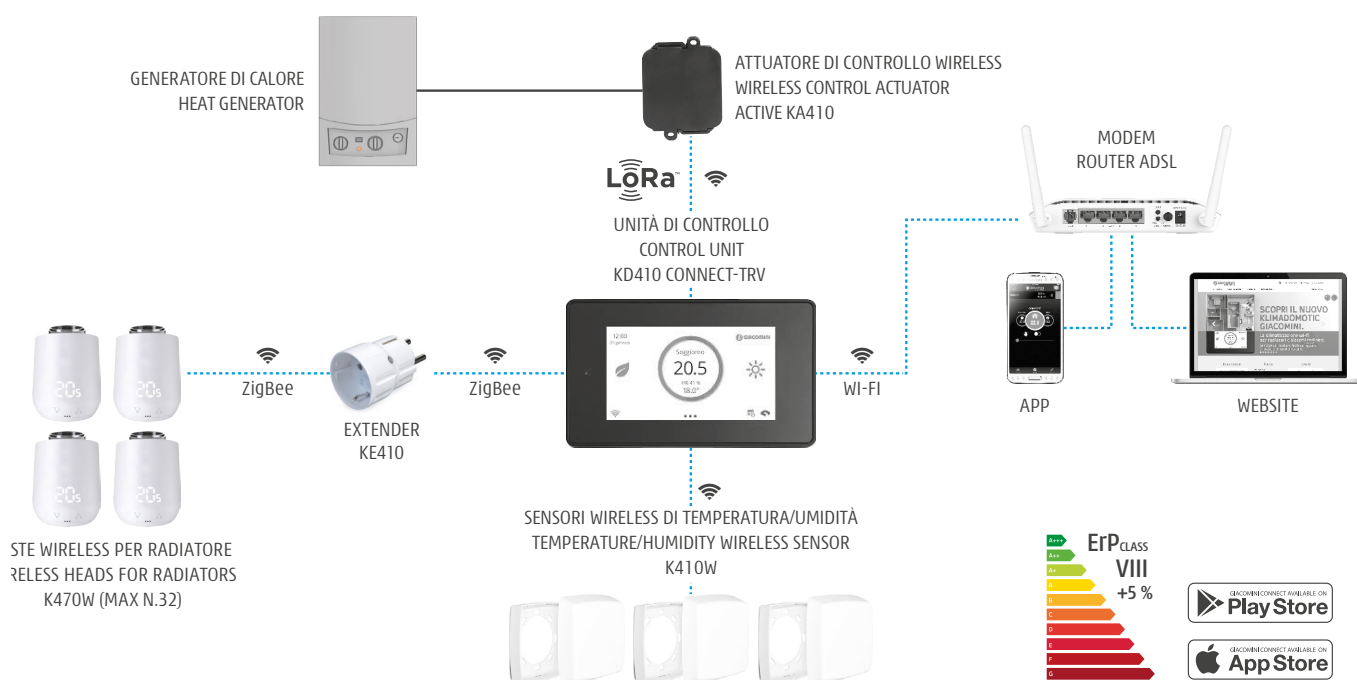

PRODUCT CODE	A [mm]	B [mm]	C [mm]
K470WX021	62	83	68

## ➤ Reference standards

The K470W wireless heat complies to the Standards set forth by the EMC 2014/53/EU Directive.

## ➤ Example of application with KLIMAdomotic products

## Product specifications

### **K47oWX021**

Wireless head for radiator. Communication Standard HA 1.2 ZigBee. Radio frequency 2,4 GHz. Ring nut connection M30 x 1,5 mm, including adaptor for other valve bodies (except DB series valves). LED display and multifunction buttons. Power: 2 x 1,5 V AA batteries. Protection class: IP20. Pollution degree: 2. Temperature control range: 8÷28 °C. Working temperature 0÷50 °C. Storage temperature -20÷70 °C. White ABS casing. Dimensions 62 x 83 x 68 mm. Compliant to EMC 2014/53/EU Directive. Use with the KD410 Connect-TRV control unit to control the heating system (KLIMAdomotic TRV series) from remote.

 **Safety Warning.** Installation, commissioning and periodical maintenance of the product must be carried out by qualified operators in compliance with national regulations and/or local standards. A qualified installer must take all required measures, including use of Individual Protection Devices, for his and others' safety. An improper installation may damage people, animals or objects towards which Giacomini S.p.A. may not be held liable.

 **Package Disposal.** Carton boxes: paper recycling. Plastic bags and bubble wrap: plastic recycling.

 **Additional information.** For more information, go to [giacomini.com](http://giacomini.com) or contact our technical assistance service. This document provides only general indications. Giacomini S.p.A. may change at any time, without notice and for technical or commercial reasons, the items included herewith. The information included in this technical sheet do not exempt the user from strictly complying with the rules and good practice standards in force.

 **Product Disposal.** Do not dispose of product as municipal waste at the end of its life cycle. Dispose of product at a special recycling platform managed by local authorities or at retailers providing this type of service.
